

A 6x6 grid puzzle. The grid contains numbers and circles. The numbers are: Row 1: (1,1)=8, (1,5)=2, (1,6)=4; Row 2: (2,2)=4, (2,3)=3, (2,4)=5, (2,6)=2; Row 3: (3,1)=9, (3,3)=6, (3,4)=3, (3,6)=8; Row 4: (4,1)=5, (4,3)=1, (4,4)=6, (4,5)=3, (4,6)=9; Row 5: (5,2)=6, (5,3)=8, (5,4)=4, (5,6)=1; Row 6: (6,1)=9, (6,3)=2, (6,6)=1, (6,7)=7, (6,8)=4. The circles are located at: (1,3), (1,4), (1,6), (2,1), (2,5), (3,2), (3,5), (4,2), (4,6), (5,1), (5,4), (5,5), (6,2), (6,3), (6,5), (6,6), (6,7), (6,8). The lines connect the circles in a continuous path: (1,3) to (1,4) to (1,6) to (2,1) to (2,5) to (3,2) to (3,5) to (4,2) to (4,6) to (5,1) to (5,4) to (5,5) to (6,2) to (6,3) to (6,5) to (6,6) to (6,7) to (6,8).
