

A 6x6 grid with numbers and a path. The numbers are: Row 1: (1,1)=6, (1,4)=3, (1,5)=1, (1,6)=2; Row 2: (2,1)=7, (2,2)=2, (2,3)=1, (2,4)=4; Row 3: (3,3)=1, (3,4)=1, (3,5)=9; Row 4: (4,1)=5, (4,3)=6, (4,5)=1, (4,6)=4; Row 5: (5,1)=9, (5,3)=4, (5,4)=6, (5,5)=6, (5,6)=8; Row 6: (6,2)=6, (6,3)=3, (6,4)=8, (6,5)=5. A path of grey lines connects the following cells: (1,2) to (1,3), (1,3) to (1,4), (1,4) to (2,4), (2,4) to (2,3), (2,3) to (2,2), (2,2) to (2,1), (2,1) to (3,1), (3,1) to (3,2), (3,2) to (3,3), (3,3) to (3,4), (3,4) to (3,5), (3,5) to (3,6), (3,6) to (4,6), (4,6) to (4,5), (4,5) to (4,4), (4,4) to (4,3), (4,3) to (4,2), (4,2) to (4,1), (4,1) to (5,1), (5,1) to (5,2), (5,2) to (5,3), (5,3) to (5,4), (5,4) to (5,5), (5,5) to (5,6), (5,6) to (6,6), (6,6) to (6,5), (6,5) to (6,4), (6,4) to (6,3), (6,3) to (6,2), (6,2) to (6,1).
