

A 9x9 grid with numbers and grey lines. The grid is divided into four quadrants by a vertical line between columns 4 and 5, and a horizontal line between rows 4 and 5. The numbers are placed in the following cells:

Row	Col 1	Col 2	Col 3	Col 4	Col 5	Col 6	Col 7	Col 8	Col 9
1	8				3				6
2	7			8					
3							9	1	
4		8	2			9	3		
5		7		3	9		2		
6		2		4		6			
7	6		5				8		
8				9					
9		2			7	1	5		

The grey lines represent a puzzle structure, with lines connecting numbers in the same row or column. For example, in the first row, a line connects the '8' in column 1 to the '3' in column 5. In the second row, a line connects the '7' in column 1 to the '8' in column 4. In the third row, a line connects the '9' in column 7 to the '1' in column 9. In the fourth row, a line connects the '8' in column 2 to the '2' in column 3. In the fifth row, a line connects the '7' in column 2 to the '3' in column 4. In the sixth row, a line connects the '2' in column 2 to the '4' in column 4. In the seventh row, a line connects the '6' in column 1 to the '5' in column 3. In the eighth row, a line connects the '9' in column 4 to the '8' in column 7. In the ninth row, a line connects the '2' in column 2 to the '7' in column 5. In the ninth row, a line connects the '1' in column 6 to the '5' in column 8.
