

A 5x5 grid with numbers and paths. The grid is divided into four quadrants by a vertical line between columns 2 and 3, and a horizontal line between rows 2 and 3. The numbers are placed in the following cells:

- Row 1: (1,1)=5, (3,3)=9, (4,3)=6
- Row 2: (2,2)=3, (3,2)=2, (4,1)=6, (4,4)=1
- Row 3: (1,2)=8, (2,3)=6, (3,3)=1, (4,3)=3, (5,4)=3
- Row 4: (1,1)=7, (2,3)=5, (3,3)=1, (4,3)=7, (5,1)=6, (5,3)=3
- Row 5: (2,5)=4, (3,1)=9, (4,4)=5

There are four paths, each starting from a diamond and ending at a diamond:

- Path 1: Starts at (1,1), goes down to (2,1), then right to (2,2), then down to (3,2), then right to (3,3), then down to (4,3), then right to (4,4), then down to (5,4). Ends at (5,4).
- Path 2: Starts at (3,3), goes left to (3,2), then down to (4,2), then right to (4,3), then down to (5,3). Ends at (5,3).
- Path 3: Starts at (4,3), goes left to (4,2), then down to (5,2), then right to (5,3), then down to (5,4). Ends at (5,4).
- Path 4: Starts at (4,4), goes left to (4,3), then down to (5,3), then right to (5,4). Ends at (5,4).
