

A 10x10 grid with 30 black circles scattered across it. The circles are distributed in a way that suggests a random process, with some clusters and some empty spaces. For example, there are circles at (1,1), (1,4), (2,2), (2,5), (3,3), (3,6), (4,1), (4,4), (4,7), (5,2), (5,5), (5,8), (6,1), (6,4), (6,7), (7,2), (7,5), (7,8), (8,1), (8,4), (8,7), (9,2), (9,5), and (9,8) assuming the top-left corner is (1,1).
