

A 10x10 grid with a light gray background and darker gray grid lines. Twenty-five black circles are scattered across the grid. The circles are of uniform size and are distributed in a way that appears random, with some clusters and some empty spaces. For example, there is a small cluster of three circles in the lower-left quadrant, and another of two in the upper-right quadrant. The circles are not aligned with the grid lines, but their positions are defined by their centers relative to the grid intersections.
